TROPICAL CYCLONE BULLETIN NR. 4
Super Typhoon INDAY (BAVI)

Issued at 5:00 PM, 08 July 2026
Valid for broadcast until the next bulletin at 11:00 PM today.

"INDAY" MAINTAINS ITS STRENGTH WHILE MOVING WESTWARD OVER THE PHILIPPINE SEA EAST OF NORTHERN LUZON

Location of Center (4:00 PM)

The center of the eye of Super Typhoon INDAY was estimated based on all available data at **1,170 km East of Northern Luzon (17.1°N, 132.7°E).**

Intensity

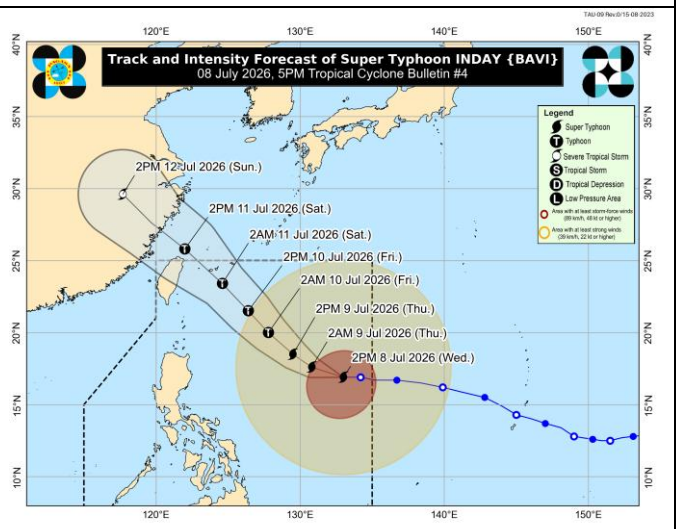
Maximum sustained winds of **195 km/h** near the center, gustiness of up to **240 km/h**, and central pressure of **920 hPa.**

Present Movement

Westward at 20 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **880 km** from the center



TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 AM 09 July 2026	17.6	130.8	960 km East of Northern Luzon	185	STY	WNW 20
24-Hour Forecast 2:00 PM 09 July 2026	18.5	129.5	830 km East of Northern Luzon	185	STY	NW 15
36-Hour Forecast 2:00 AM 10 July 2026	20.0	127.8	670 km East of Calayan, Cagayan	175	TY	NW 20
48-Hour Forecast 2:00 PM 10 July 2026	21.5	126.4	480 km East of Itbayat, Batanes	175	TY	NW 20
60-Hour Forecast 2:00 AM 11 July 2026	23.4	124.6	405 km Northeast of Itbayat, Batanes	165	TY	NW 25
72-Hour Forecast 2:00 PM 11 July 2026	25.8	122.0	560 km North of Itbayat, Batanes (OUTSIDE PAR)	155	TY	NW 30
96-Hour Forecast 2:00 PM 12 July 2026	29.6	117.7	1,065 km North Northwest of Extreme Northern Luzon (OUTSIDE PAR)	95	STS	NW 25

Super Typhoon INDAY (BAVI)
Issued at 5:00 PM, 08 July 2026
Valid for broadcast until the next bulletin at 11:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	**Luzon**	**Visayas**	**Mindanao**
1 Wind threat: **Strong winds**	**Ilocos Norte, Apayao, the northern portion of Abra** (Tineg, Lagayan, Danglas, San Juan, Lagangilang, Licuan-Baay, Malibcong, Lacub, Daguioman, Dolores, La Paz), **Kalinga, the eastern portion of Mountain Province** (Natonin, Paracelis), **the eastern portion of Ifugao** (Aguinaldo, Alfonso Lista)**, Batanes, Cagayan including Babuyan Islands, Isabela, the northeastern portion of Quirino** (Maddela), **the northern portion of Aurora** (Dilasag, Casiguran)**,** and **the northern and central portions of Catanduanes** (Pandan, Caramoran, Bagamanoc, Panganiban, Viga, Gigmoto, Baras, San Miguel)**.**	-	-
	Warning lead time: **36 hours** Range of wind speeds: **39 to 61 km/h (Beaufort 6 to 7)** Potential impacts of winds: **Minimal to minor threat to life and property**		

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 9 issued at 5:00 PM today** for the heavy rainfall outlook due to TC INDAY and the Southwest Monsoon.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The highest Wind Signal that may be hoisted throughout INDAY's passage is Wind Signal No. 2 or 3.

The enhanced Southwest Monsoon and the periphery of Super Typhoon INDAY will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Pangasinan, Zambales, Bataan, CALABARZON, most of MIMAROPA, Bicol Region, most of Visayas, and most of Mindanao.
- **Tomorrow (09 July):** Most of the country.
- **Friday (10 July):** Most of the country.

Valid for broadcast until the next bulletin at 11:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the northern and eastern seaboards of Luzon, and the eastern seaboard of Visayas. For more details, refer to Gale Warning No. 2 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 5.0 m**: The seaboard of Isabela; the eastern seaboards of Batanes and Cagayan including Babuyan Islands.
- **Up to 4.5 m**: The seaboard of Camarines Norte; the remaining seaboards of Batanes and Cagayan including Babuyan Islands; the northern seaboards of Aurora, Camarines Sur, and Eastern Samar; the northern and eastern seaboards of Polillo Islands and Catanduanes; the eastern seaboard of Northern Samar.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The eastern seaboard of Davao Oriental; the remaining seaboards of Aurora and Eastern Samar; the northern seaboard of Quezon.
- **Up to 3.5 m:** The eastern seaboards of Albay, Sorsogon, Dinagat Islands, Bucas Grande-Siargao Islands, and Surigao del Norte; the northern seaboard of Northern Samar.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of Southern Leyte and Kalayaan Islands; the remaining seaboards of Surigao del Norte including Bucas Grande-Siargao Islands; the southeastern seaboard of Davao Occidental; the western seaboard of Masbate.
- **Up to 2.0 m:** The seaboards of Siquijor, Camiguin, and Agusan del Norte; the northern seaboard of Ilocos Norte; the remaining seaboards of Quezon, Albay, Sorsogon, Masbate, Romblon, Northern Samar, and Eastern Samar; the southern seaboards of Bohol and Cagayancillo Islands; the western seaboard of mainland Palawan.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions**.

Other coastal waters have forecast wave heights of less than 2.0 m.

BAGONG PILIPINAS

TROPICAL CYCLONE BULLETIN NR. 4
Super Typhoon INDAY (BAVI)
Issued at 5:00 PM, 08 July 2026
Valid for broadcast until the next bulletin at 11:00 PM today.

TRACK AND INTENSITY OUTLOOK
• **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.** • INDAY is forecast to move generally west northwestward over the next 12 hours. It will then turn northwestward while remaining over the Philippine Sea and may be nearest to Extreme Northern Luzon by Friday (10 July) evening or Saturday (11 July) morning before heading towards the southern islands of Japan and the sea north of Taiwan. INDAY is forecast to exit the PAR by Saturday (11 July) and make landfall over the eastern coast of mainland China by Sunday (12 July). • INDAY will maintain its strength as a super typhoon until tomorrow (09 July). It is forecast to weaken into a typhoon by tomorrow evening or Friday early morning until it exits the PAR.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
